SUMMARY

Self-starter product manager with 7+ years of experience in building and shipping scalable products/solutions. My greatest strength lies in successful delivery of products by bridging the gap between technical challenges and business goals.

***Skillset and Strengths*:**

• *Moneyball* process trained	• **Agile** Methodology	• Strong communication skills
• Project lifecycle management & tracking	• Feature scoping & vision	• Team player & customer first focus
	• *Certified ScrumMaster®*	• Cross Team Collaboration

EXPERIENCE

Product Manager, Microsoft, Seattle WA   *2013-Current*

    Windows Shell, Windows Devices Group
- Ideated, designed and shipped two versions (alpha and release candidate) of WinAnyCode- a Visual Studio extension. This helped improve the developer **check-in** efficiency by **~13%**.
- Led a cross-functional team of software developers, QAs, and data analysts to establish technical requirements and delivery for a new *Automated Feedback Tool*. The tool resulted in gap identification of existing tooling and processes, leading to a net **increase in developer productivity by 2%.**
- Proposed, and delivered the mission critical strategy and metric for "*developer productivity optimization".* Drove increase in developer productivity by ~**3.5%***,* resulting in *174 'added' developers* for the organization.

    Enterprise Services – Business Intelligence
- Designed and evangelized delivery of security implementation for Enterprise Services on DAX Platform.
- Improved **reporting solution NPS** for end-user access approval time by **18% for Microsoft Consulting Services** (globally).
- Scoped and delivered, from requirement gathering to shipping, the DAX Users Engagement Validation Report.

Product Manager, [Stealth Mode**]** '*productivity based social media'* ed tech start up   *2016-Current*
- Single handedly built, managed and led a team of 5 developers and 1 UX designer to design and deliver an ed-tech mobile platform, for both **iOS and Android**.
- Defined and crafted vision for product roadmap while maintaining the product backlog.

Technical Consultant, RoundCorner, Boston, MA   *2012-2013*
- Owned end-to-end on-boarding and implementation for new clients. Helped customize solution by collecting client data and working with development team to deliver client requirements.
- Led client acquisition and **requirement assessment** to maximize ROI and increase market share. Drove and delivered addition of three new clients to company portfolio.

Software Engineer, Samsung, Bangalore, India   *2009-2011*
- Managed client device OS optimizations for AT&T and Qualcomm.
- Implemented OS optimizations and built system tools for the Brew Mobile platform.
- Designed and delivered *Last Screen Capture* and *Error Log Segregation* tool.

EDUCATION

Duke University, The Fuqua School of Business, Durham, NC, US   *GPA* - 3.8 / 4
